

2.3 Pressure on Inclined Surface

Pressure differs here, depending on h .

Surface can be vertical or ~~slanted~~

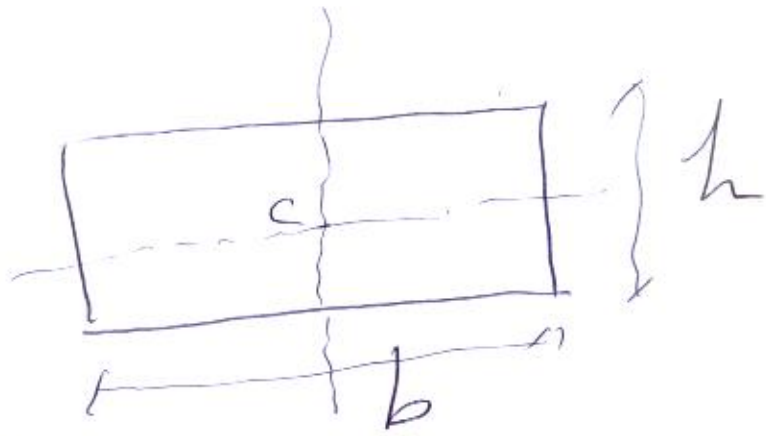

$$\begin{aligned} * F &= P_c A \\ &= \gamma h_c A \end{aligned}$$

$$* y_p = y_c + \frac{I_c}{y_c A}$$

I_c = moment of inertia of the area about centroidal axis

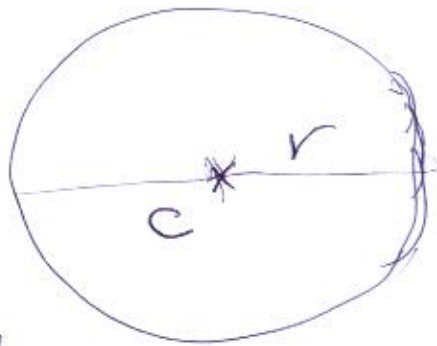

2)

$$I_c = bh^3/12$$

$$I_c = bh^3/36$$

$$I_c = \pi r^4/4$$

Ex

Find magnitude of pressure force on the gate & its point of action.

$$F = P_c A$$

$$= \gamma h_c A$$

$$= 9810 (1.22 + 1) (1 \times 2)$$

$$= 43.56 \text{ kN}$$

$$y_p = y_c + \frac{I_c}{y_c A}$$

$$= (1.22 + 1) + \frac{(1 \times 2^3) / 12}{(1.22 + 1) \times (1 \times 2)}$$

$$= 2.37 \text{ m}$$

17)

$$R = F_2 - F_1$$

$$Rx = F_2 y_{p2} - F_1 y_{p1}$$

5) Dam Stability

1. Crushing (at a point)

2. Sliding (horizontal move \Rightarrow)

$$F = W_t f$$

f = friction coefficient

3. Overturning (moment at toe)

Overturning moment vs Stability moment

$$Fy \quad \text{vs} \quad W_t x$$

6) Dams in Saudi Arabia

* Purposes of dams

- Flood control
- Groundwater recharge
- Power generation
- Direct use
- Recreation

* Number of dams in S.A.

* ~~510~~ 510 (mostly gravity dam)

Storage capacity \approx 2.2 billion m^3

Largest one is King Fahad Dam, Bisha h.
